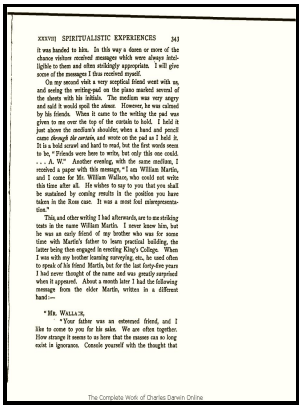
Report on the composition of commoner British wines and cordials (alcoholic and non-alcoholic) - together with report by the Government Chemist on the examination of samples

His Majestys Stationery Office - Nineteen Centuries of Drink (1895)



XXXVIII SPIRITUALISTIC EXPERIENCES 343

it was handed to him. In this way a dozen or more of the chance visitors received messages which were always intelligible to them and often strikingly appropriate. I will give some of the messages I thus received myself.

On my second visit a very sceptical friend went with me, and seeing the writing-pad on the piano marked several of the sheets with his initials. The medium was very angry and said it would spoil the séance. However, he was calmed by his friends. When it came to the writing the pad was given to me over the top of the curtain to hold. I held it just above the medium's shoulder, when a hand and pencil came through the curtain, and wrote on the pad as I held it. It is a bold scrawl and hard to read, but the first words seem to be, "Friends seem here to write, but only this one could . . . A. W." Another evening, with the same medium, I received a paper with this message, "I am William Martin, and I come for Mr. William Wallace, who could not write this time after all. He wishes to say to you that you shall be sustained by casting results in the position you have taken in the Ross case. It was a most foul misrepresentation."

This and other writing I had afterwards, are to me striking tests in the name William Martin. I never knew him, but he was an early friend of my brother who was for some time with Martin's father to learn practical building, the latter being then engaged in erecting King's College. When I was with my brother learning surveying, etc., he used often to speak of his friend Martin, but for the last forty-five years I had never thought of the name and was greatly surprised when it appeared. About a month later I had the following message from the elder Martin, written in a different hand:—

"MR. WALLACE,

"Your father was an esteemed friend, and I like to come to you for his sake. We are often together. How strange it seems to us here that the reasons are so long exist in ignorance. Console yourself with the thought that

This triggers an allergic reaction and causes common symptoms like itchy eyes, coughing, sneezing and wheezing, scientists said. Most now have screw propellers, and a top speed around 10 MPH.

Alcohol in the 17th Century: Age of Discovery

She applies the language of systems to things of the imagination.

Forgotten Futures X

Dewsbury has a fine town hall, an ancient parish church, a general infirmary which occupies an exceedingly handsome building, waterworks under the control of the Corporation, excellent educational institutions including a large Technical School and School of Science and Art , and a system of municipal government, under which all the best interests of the place are fully protected and judiciously advanced. The results of the experiments showed that storage of sea buckthorn juices for 7 d at cold temperature 6 degrees C already resulted in a degradation of TAA of about 11% to 12%.
