Detailed Discussion of Bears Used in Traditional Chinese Medicine

However, studies have shown the opposite to be true, as most of these farms rely on wild-caught bears, with the Asiatic black bear being the most commonly used species. Before the existence of bear farms the demand in China was about 500 kilos annually.

Illegal bear bile trade rampant in Asia

It calls for the closure of bear farms stocked with illegally-sourced wild bears, in accordance with the. However, few violators are caught or prosecuted because these laws are rarely enforced. Regardless of the legality of trade within countries, international trade is not allowed.

Animal Wellness Action Says the Global Trade in Bear Parts Must End

Some bears even commit suicide to escape the endless suffering they experience on the farms.

Pills, Powders, Vials & Flakes: The bear bile trade in Asia

Bear paw is traditional delicacy, but has also featured prominently in some 17th century European cuisines. Like tigers, bears have a strong influence in the traditions and histories of several nations including , , , and are also featured in. The plan summarises the threats faced by bears in India, and outlines management actions to be undertaken by states for the conservation and welfare of the animal.

Buyers of Bear Parts

They are in particularly high demand in countries such as China and Vietnam. Everyone has a role to play. Bears are nocturnal and very difficult to find, so it hasn't been an issue.

New law regulates North Country trade in black bear parts for Asian markets

They also encouraged bear farming along with other types of animal farming in poor areas to drive economic development. But in places where there's not that enforcement and regulation, what we don't know, we don't know.

Illegal bear bile trade rampant in Asia

They are also extremely malnourished from a diet of grain mash or porridge, and their teeth and claws are often removed to prevent injuries to the farmers. This is evidenced by a rescue group which found twenty percent of their bears missing limbs from traps. They put a ring in the nose, a brass ring that remains there permanently.
