## Canadian Mineral Exploration Information Bulletin

In 2020, the number of senior companies and their combined spending decreased by 9% and 20%, respectively. Still, while business confidence has improved for the first time since the pandemic began, the study found that investment intentions compared to previous years are still relatively weak. Business activity Most businesses reported slower sales growth over the past 12 months compared with the previous 12 months.

## Investment Intentions of Canadian Entrepreneurs

Results of the Winter 2020—21 Survey Vol.

## Upbeat entrepreneurs signal improved investment intentions for 2021: Survey

Cleroux says while many entrepreneurs were wary about allowing employees to work from home before the pandemic, he says the last 10 months have shown it can benefit a business. Businesses understand that once restrictions are lifted, the economy will rebound much faster than with other recessions, he said.

## Canadian Mineral Exploration Information Bulletin

MONTREAL -- A growing number of Canadian entrepreneurs say they plan to invest more in 2021 than they did last year as the vaccine rollout, improving cash flow and a quick rebound in some sectors buoys optimism for the year ahead. Sources: Natural Resources Canada, Institut de la statistique du Québec. Sources: Natural Resources Canada, Institut de la statistique du Québec.

## Investment Intentions Survey

It leads to the discovery and development of mineral deposits that may become future mines, creating jobs — often in remote and northern communities — and attracting significant investments. Saskatchewan accounts for almost all of the spending for uranium exploration in Canada. Therefore, these companies experience more volatility with regard to spending than senior companies, who have operating revenues that can help sustain exploration efforts.

## **Business Outlook Survey—Winter 2020**

The results are based on an online survey that is carried out each September to November. This proportion is similar to results from the summer and autumn surveys.

### **Investment Intentions of Canadian Entrepreneurs**

These include the trade and the finance, insurance and real estate FIRE sectors, where some businesses are moving forward with investments to facilitate online customer sales and service. Most of the cobalt projects were located in Quebec and Ontario, followed by New Brunswick, Saskatchewan, British Columbia and Yukon. Additional information on the survey and its content is available on the.
