Deseret News

As the principal sponsor of the Toy Safety Act, Moss conducted hearings which revealed the dangers of common toys.

Archives West: Frank E. Moss papers, 1931

While many people just buy a dog because it is cute, it is important to buy a dog suited to your lifestyle. Most natural ground-water and surface-water discharge from these basins occurs by evapotranspiration ET along narrow riparian corridors that encompassed about 45,000 acres or about 1 percent of the study area. Recharge in the Paradox Basin occurs on the west flank of the San Juan Mountains and along the west side of the Uncompahgre uplift.

Value of wilderness designation in Utah

Comparison of bird diets with availability of arthropod prey from aquatic and terrestrial origins showed terrestrial insects comprised 91% of all avian diets compared to 9% of prey from aquatic origin.

Capitol Reef National Park

The authors have identified several vertical displacements of the 1.

Archives West: KUTV News collection, 1977

The Colorado River flows from right to left. Most middens contain a typical late-Wisconsinan glaciation mixture of mesic and xeric taxa, evidence that plant species responded to climate change by range adjustments of elevational distribution based on individual criteria. Install two water

storage tanks and water metering system in an existing structure located within the permit area.

Archives West: Utah Wilderness Association records, 1980

Geological Survey and Arizona Game and Fish Department experimentally removed 23,266 nonnative fish from a 9. Past soil disturbances in the Wolf Creek and West Fork of the Duchesne River area indicate that vegetation is slow to reestablish unless a persistent and timely revegetation program is carried out.
