Current and Future Educational Challenges for the Nurse Educator

Thus it happens that the European inherits from twenty to thirty cubic inches more of brain than the Papuan. By contrast, career and technical teachers today are faced with a plethora of additional expectations and demands that tend to make CTE teachers of the 20th century obsolete. As part of its work, CREDE will conduct projects under six programmatic strands: 1 national quantitative studies will measure demographic shifts in student populations; 2 research on language-learning opportunities will highlight exemplary programmatic choices; 3 effective professional development practices for teachers, paraprofessionals, and principals will be explored; 4 the influence and interaction of family, peers, and community with regard to the education of linguistically and culturally diverse students will be explored; 5 the instruction of these students in different content areas, such as science and math, will be examined; and 6 successful school reform initiatives will be identified.
