När resultaten från intervjuerna analyserats har jag inspirerats av tidigare forskning om genus och Hinduism. After analyzing the approaches, themes, and unique framework found within this encounter, it is clear that the Hindu-Jewish leadership summits mark new and significant developments in inter-religious dialogue between the two traditions, culminating in the redefinition of Hinduism as a monotheistic religion.

Дисертації:

Thus, the representation of Hindu identity as a transnational identity, linking resident and non-resident Indians to a broad sociocultural entity, the Great Hindusthan, implies: i the assertion of prevalence of the belongingness to the Hindu nation over alternative identifications constructed by the emigrants; ii the attempt of reterritorialization of transnational relations between the parts, that is, the intention of depicting Indian society as the core of transnational networks formed during emigration processes. All this has caused major changes in the traditional patterns of death rituals and mourning.

The research also finds that as academic and professional progress empower the women within their homes, their public lives have become fraught with increasing gender violence and decreasing recourse to justice.
