## How vision inspection systems help to maintain your quality control process

**Powerful Toolkit** A complete set of modern vision tools is provided, including edge finding, blob analysis, measurement, OCR, barcode reading, scripting and image processing tools.

## Vision

Figure 3: IDS Imaging Development Systems uses a random point pattern projector in its pre-calibrated Ensenso stereo 3D camera system.

## Optimizing machine vision platform to enhance automated inspection and detection

Machine vision is a multi-disciplinary subject, utilizing techniques drawn from optics, electronics, mechanical engineering, computer science, and artificial intelligence.
