

Satellite derived sea-surface temperatures from NOAA spacecraft

U.S. Dept. of Commerce, National Oceanic and Atmospheric Administration, National Environmental Satellite Service - Information from NOAA's Satellite Fleet Helps Point to How Warming Ocean Temperatures Impact Marine Food Web and Whale Distribution

Description: -

- Mosses -- Germany (West)

Art -- Japan -- Nara-shi

Art, Buddhist -- Japan -- Nara-shi

Tōdaiji (Nara-shi, Japan)

Scanning systems

Scientific satellites

Ocean temperature -- Data processingSatellite derived sea-surface temperatures from NOAA spacecraft

- Uni-Taschenbücher -- 1250

NOAA technical memorandum ; NESS 78Satellite derived sea-surface temperatures from NOAA spacecraft

Notes: Bibliography: p. 67-68

This edition was published in 1976

Filesize: 42.74 MB

Information from NOAA's Satellite Fleet Helps Point to How Warming Ocean Temperatures Impact Marine Food Web and Whale Distribution

DAAC, while the the coastwatch ftp only contains L3U data due to high data volume.

Improving Satellite Sea Surface Temperature Analysis

Obtaining accurate measurements on global scales, however, has been extremely challenging.

Sea Surface Temperature

All MetOp platforms are sun synchronous and generally view the same earth location twice a day latitude dependent.

Sea Surface Temperature

Satellite SST is the longest and most mature application of ocean remote sensing. Once the new GOES West satellite becomes operational and we receive SST data, the images for GOES West will be changed to the style of the Goes East regions. The data are reported hourly, in AHI Full Disk FD , for view zenith angle not exceeding 68°, both in swath projection L2P and as a 0.
