**Final Evidence Review: Syphilis**

### Infection: Screening

Doubeni, MD, MPH Mayo Clinic, Rochester, MN ; John W. More national-level data on prevalence of STIs in certain risk groups are also needed, including lesbian, bisexual, nonbinary, and transgender persons. It bases its recommendations on the evidence of both the benefits and harms of the service and an assessment of the balance.

### Final report of ERB Funding Task Force

All members of the USPSTF receive travel reimbursement and an honorarium for participating in USPSTF meetings. Placental histopathology of congenital syphilis. The preparation, dosage, and length of treatment depend on the stage and clinical manifestations of disease.

### Task Force on Study of Marriage presents final report

MEDLINE® was searched from 1996 to September 2003. Single dose oral azithromycin was used for high risk individuals in a targeted mass treatment program during a syphilis outbreak in Vancouver, B. Copyright Notice: USPSTF recommendations are based on a rigorous review of existing peer-reviewed evidence and are intended to help primary care clinicians and patients decide together whether a preventive service is right for a patient's needs.

### Final report of the 2007 Agent Compensation Task Force

Rapid public health interventions in response to an outbreak of syphilis in Los Angeles. National Coalition of Sexually Transmitted Disease Directors. Behavioral counseling interventions to prevent sexually transmitted infections: updated evidence report and systematic review for the US Preventive Services Task Force.

### **Final Evidence Review: Syphilis Infection: Screening**

Control conditions included usual care, attention controls, wait list, or minimal interventions such as less than 15 minutes of STI information. Serious consequences of STIs include pelvic inflammatory disease, infertility, cancer, and AIDS. A study of the relationship stability of sexual partners found that 33 percent of partnerships dissolved after one partner was notified by a disease intervention specialist that the other partner had syphilis.

### **Final report of ERB Funding Task Force**

No studies evaluated this question directly.

### **Final report to the Department of Environmental Quality & Department of Agriculture**

Health Care for the Homeless Clinicians' Network, National Health Care for the Homeless Council, Inc. It is for informational purposes and may not be suitable for legal purposes.

### **Task Force on Study of Marriage presents final report**

The FTA-ABS has a sensitivity of 84 percent in primary syphilis, and almost 100 percent in other stages, and a specificity of 96 percent. Screening for syphilis previously received an A recommendation from the USPSTF for pregnant women and individuals considered to be at high risk.
