## Seafood & Health

Control of fishing vessels in our EEZ will be further consolidated in the next five years and the ministry will be in a better position to deter illegal, unregulated and unreported IUU fishing.

## Sustainability

The intent of the program is to provide Western Pacific communities access to fisheries that they have traditionally depended upon, but may not have the capabilities to support continued and substantial participation in, possibly due to economic, regulatory, or other barriers. In the same vein the ministry will spare no efforts in maintaining existing acquis in the post Cotonou negotiations through the development of a Fisheries Partnership Agreement with the European Union EU. The ministry jointly with FAO is implementing a study on the Stock Assessment and Fishery Management of the St.

## Solomon Islands Ministry of Fisheries and Marine Resources— Management Plans

Hawaii Tuna and Large Pelagics The of Honolulu Hawaii is hosting a fishery improvement project for tuna, swordfish, and the other species of the Hawaii pelagic longline fisheries.

## Fishery Ecosystem Plan for Pelagic Fisheries of the Western Pacific

The average American consumer eats less than one meal of fish per week. Staff coordinate and administer the processing of proposed and final regulations to implement fishery management plans that are approved by the U.

## Western Pacific Community Development Program

We are home to the lovable, yet critically endangered Hawaiian monk seal—only 1,400 remain. There is also strong evidence to suggest that selenium boosts the immune system, has anti-inflammatory effects, boosts the beneficial antioxidant effects of Vitamin E and even detoxifies

mercury.
