

Student nurse numbers - the report of the Steering Group on Student Nurse Intake Assessment.

Scottish Office - Nursing

Summary of evidence on managing the team on the ward

	Type of evidence	Key message
Staff retention	Varied, including theoretical studies and qualitative studies, but with methodological limitations	Factors tend to be multifactorial and include non-pay rewards and local ward climate
Staff wellbeing	Qualitative studies	Evaluation of interventions such as Schwartz boards show the value of initiatives to help staff deal with the emotional burden of care
Impact of staff wellbeing on patient satisfaction	Qualitative studies	Patient experiences affected by staff wellbeing and local ward climate
Ward manager skills	Small exploratory studies	Nurse managers need time and training to manage staff absence and use workload planning tools well
Improvement interventions	Small exploratory studies	Interventions to improve ward care from protected time for leaders or to improve ward care are often poorly evaluated and may have unintended consequences

Nursing Education Statistics

Regis College offers an online MSN and an online Doctor of Nursing Practice DNP from both and backgrounds.

Reducing Pre

Oxford, UK: Oxford University Press, 1996:25-55.

Introducing an online portfolio for practice placement assessments

Feelings Initially I felt confident. It is important to ask the client if she has had any previous slips or falls, as a history of these is one of the most common risk factors for future falls Delorito 2002.

Interactive Activities for Nursing Students

But what I am really trying to teach my student nurses is the why of how we understood, or figured out, a specific problem. I used evidence from reputable sources to identify suitable dressings to promote granulation and healing by sourcing up to date journals from the Cinahl and current trust policies. Assessment This assignment will describe the assessment of a client that the student nurse has worked with and show how a holistic approach to the assessment process was used and the importance for this.
