Snake species found in South Africa

The Black mamba is found in Mozambique, Swaziland, Malawi, Zambia, Zimbabwe, Botswana, South Africa Kwazulu-Natal and Namibia.

Dangerous Snakes of Southern Africa

They are powerful constrictors that readily feed on frogs, tadpoles, small fish, and occasionally rodents or nestling birds.

African Reptiles List, Pictures & Facts: Amazing Reptiles Of Africa

Black Mamba Long and strong, the Black Mamba has been popularized in the media and has quite the reputation.

You Don't Want To Encounter These Snakes In South Africa

If you encounter a Mozambican spitting cobra stay still and see if the snake is going for you. Even when one the victim is treated with an anti-venom, the damage done to the body tissues is often tremendous. If you remain completely still the cobra will most probably move away.
