## Welcome to TCEO

Government information system, which includes 1 this computer, 2 this computer network, 3 all computers connected to this network, and 4 all devices and storage media attached to this network or to a computer on this network. At any time, and for any lawful Government purpose, the government may monitor, intercept, and search and seize any communication or data transiting or stored on this system. In addition, DLS is developing an emergency response training platform to quickly produce courses during an outbreak.

## NYS Online Courses

World-class scientists and researchers work closely with CDC subject matter experts, as well as public health and clinical laboratories, to identify training needs and develop training content. These courses use instructional techniques, such as storytelling, case studies, examples, and practice with reinforcement feedback.

## Centers for Disease Control and Prevention

These competencies identify critical knowledge and skills, establish employee development pathways, and aid in the development of a sustainable public health laboratory structure for the future. Additionally, virtual reality technology can be used as a way to develop and assess laboratory skills outside of the laboratory environment. DLS works to introduce new techniques, training methods, and technologies for laboratory systems — quality and safety, informatics and data science, and workforce development — to help laboratory professionals conduct diagnostic tests, rapidly identify public health threats, and improve surveillance and outbreak responses.

## Training and Workforce Development Programs for Public Health and Clinical Laboratories

DLS Director, Reynolds Salerno, PhD, highlighted the accomplishments of the CDC Laboratory Safety Training Board in strengthening the culture of safety.

### **NYS Online Courses**

Building on this success, in the future, the following laboratory safety courses will be made available for all U. Use TCEO to search for CE opportunities, complete course evaluations and posttests, receive your CE certificates, and manage your CE transcript. The courses cover 100 different laboratory training topics and were delivered to more than 20,000 scientists in all 50 states and in over 50 countries.
