Decision Making in Child Welfare Services

For the subset of families with the highest levels of overlapping needs, identify the first time when a public human services agency became aware of a problem with the individual or family so as to uncover where the first opportunity to intervene likely occurred.

Effective child welfare hotline system

Provide data on the race, ethnic, and language makeup of all staff and board members at your organization.

Standard 1 Intake: Receiving a Referral and Determining the Appropriate Response

We are aware of at least one agency that created an internal-facing version of active contract management to address shortfalls in its permanency outcomes.

Decision Making in Child Welfare Services

Time series of the data that shows trends at monthly intervals over time ideally, going back at least two years. Examples to help agencies select leading and lagging performance metrics 3. These teenagers — and in particular, LGBTQ youth and youth of color — are at extraordinarily high risk of experiencing difficulties in transitioning to adulthood, such as failing to complete high school or secure quality employment, and they also have high rates of involvement in the criminal justice system.

Effective child welfare hotline system

Casey Foundation, January 1, 2009,. They found 93% of referrals that were screened in were done so according to policy NC DSS, 2017b. Agencies should incorporate client shadowing, user experience interviews, and the co-design of solutions with those with system experience into their process for identifying what to improve and how to improve it.
