Quantifying the demand for hospital care services: a time and motion study

This was no simple task given the propaganda fuelling the Hoxie report and the consequent union opposition to scientific management. This type works better on tasks that have fewer components or workers that do fewer tasks overall. For instance, answering emails at your job may be important, but unless you're in customer service, it likely has a lower value overall than finishing an important report.

Time Study

You don't have to assign a number; just label them as high value or low value.
