## Planning new landscapes: A comparison of the Columbia basin project and the IJsselmeerpolders

A review of this project illustrates what can be learned from Dutch land-use planning. In this paper the geological, geotechnical, geohydrological, environmental and constructional aspects of this planned land reclamation project will be discussed.

## Agricultural Settlement and the Layout of Land

However, he was and remained a Frisian monarch, an independent ruler, who not only looked at the Frankish world but also had to take into account the rest of the coastal region east of the Vlie and other areas around the North Sea. Further works in the project are being carried out to give the rivers more space to flood and in this way reducing the flood height. After the new municipalities of Southern Flevoland were established in 1984, belonging to no province as was the case with Lelystad, the provincial issue required renewed attention.

## Zuiderzee Works

**A b s t r a c t** Five late-medieval historical chronicles from Frisia present a series of legends about the Frisians, concerning their origin and the acquisition of their freedom. The Wieringermeer and later polders were divided into plots of about 50 acres 20 ha. .

## Planning new landscapes: A comparison of the Columbia basin project and the IJsselmeerpolders

Daarom zijn we mede aangewezen op wat de historische bronnen zeggen over het verband achter de verschillen de kerkstichtingen. Considering the full socio-economic value of reclamation projects should be a fundamental step for guiding investors and public bodies towards efficient choices on resource allocation. The next step was draining all the water from the future polder.
