## The Boundary Integral Equation Method for Porous Media Flow, Eos Transactions

Some of the error values are tabulated in. In order to reconstruct the pressure, from its wavelet coefficient we obtain the expression for by integrating Equation 35 with respect to  $t$  which gives 38 6.

The project is intended to make a leap from these results to the analysis of much more general nonlinear global and localised BDIDEs.

Convergence Analysis The convergence of the Chebyshev wavelets basis is indicated in this section. One proves the absolute convergence of the proposed GIEs and establishes an advantage with the known GIEs.
