History of modern philosophy in France : Lévy

Although its boundaries are not easily settled, the period approximately spanned from the late 1400s to the end of the 18th century. Thanks to the intensification of relations with non-European societies, their preexisting knowledge of Greek philosophy and the generosity of magnates who were supporting their research, humanists rediscovered central texts of the period — new waves of Platonism, Aristotelianism, Stoicism, Skepticism, and ensued, whose influence would greatly impact key figures of early modernity. This is a concise but comprehensive history of the way in which philosophy developed during the modern era in France.

Early Modern Philosophy: From Aquinas to Kant

In the eighteenth century it is preparing and announcing it; in the nineteenth it is trying in part to check and in part to deduce the consequences of it. This is a concise but comprehensive history of the way in which philosophy developed during the modern era in France.

We have had very strong reasons for this. But that enlightenment led to a great awakening in the societies of man — expressed through art, innovation, technological advances and an expansion of philosophy.

History of modern philosophy in France.

Defining the Beginning and End of the Period The roots of early modern philosophy can be traced back as far as the 1200s — to the most mature moment of the scholastic tradition. The philosophies of authors such as Aquinas 1225-1274 , Ockham 1288-1348 and Buridan 1300-1358 accorded full trust to human rational faculties: if God gave us the faculty of reasoning then we shall trust that through such faculty we can achieve a full understanding of worldly and divine matters.

History of Modern Philosophy in France by Lucien Lévy

Now, philosophers without marked originality—those, for instance, who were simply disciples of the masters—have indeed their value in the eyes of that erudition which wishes to know all there is to be known of a certain epoch.
