Emergency Department presentation of frail older people and interventions for management: Geriatric Emergency Department Intervention

In the future it would be desirable to expand this. Referral to existing primary care resources 3. Concerns have been expressed that patients presenting to EDs are being admitted to these types of wards to bypass NEAT, but without the necessary addition of service delivery.

Treating frailty

To facilitate continuity of care, the trainee will have approximately two half days per month for the duration of their training program to care for those patients. The disparate access to services among minority populations will only be corrected through creating a more responsive health care system with improved sensitivity of providers to their own biases and to the needs and perspectives of their diverse clients. Qualitative Social Research, 2000; 1 2.

Challenges and Solutions for Care of Frail Older Adults

Mason S, Nicholl J, Locker TE. Those at particular risk for a downward spiral stand to gain the most from early intervention and comprehensive treatment by a coordinated team. Most of these sites began PACE operations with Medicare and Medicaid waivers and capitation in 1990.

PCN integrated approach to care and management of the frail

Structure of health service The challenge of delivering an effective, co-ordinated intervention to decrease frailty, over a prolonged period of time and in times of crisis, is substantial.

Emergency Department presentation of frail older people and interventions for management: Geriatric Emergency Department Intervention

Discharge summaries to the RACF and PHP provide communication of the care episode and details of all referrals. CL is a Physiotherapist working in aged care and rehabilitation and delivered intervention on the Frailty Intervention Trial. The care programme offers time and funding for this task.

Care of the Elderly

Principles of intervention to reduce frailty The lack of consensus regarding the definition and components of frailty will influence clinicians' approach to intervention. Confusion assessment method: a systematic review and meta-analysis of diagnostic accuracy.
