The use of a steel mesh caging will allow for ease of meter reading.

### Building standards

A useful reference document associated with ergonomics is ISA RP60. If the enclosure opens to the outside but is set within the building structure then all pipe sleeves or entries into the building must be sealed with an approved fire sealing material.

General Meter Requirements Note: In all of the following cases in multi-occupancy dwellings, please contact Gas Networks Ireland at the earliest opportunity to provide the optimum design solution for your project.

### Gas Installation Guidelines for Designers and Builders

MASSFLOW: Some platforms are now utilising the Process Control systems for the calculations of Massflow, however in general this is not so as

'Flow Computers' of a 'standalone' nature continue to be used in that they are tried and proven, incorporate self testing features such as pulse integrity and finally use proven algorithms that are readily accepted by the authorities monitoring the fiscal metering. Less serious damage OHS-Sect 242. The courts of England and Wales are supportive of private arbitration as an acceptable alternative to litigation.
