Laboratory Safety Manual

Bulky or dangling attire and easily combustible clothing should not be worn in lab. Additionally, given the generic nature of some of the policies and procedures of this Manual, there may be situations where alternative procedures would provide a greater level of safety. These are also called clean benches, and are used for work with non-hazardous materials when very clean environments are needed for high purity work.

Lab Safety Manual: Laboratory Use/Procedures and Policies

The attitude of those working in the laboratory is one of the most important factors in the safe conduct of laboratory experiments. Make all personnel in the laboratory aware of the release and instruct them to stay away from the area, or, if there is a fire or health threat, to leave the laboratory.

Lab Safety Manual: Laboratory Use/Procedures and Policies

Goggles, flexible fit, regular ventilation 3. The lab bench must be resistant to the chemical actions of these substances and disinfectants.

Laboratory Safety Manual

These machines should be operated from one side, minimizing any possible hazards.

Lab Safety Rules and Guidelines

In no case should students use an extinguisher unless they cannot escape the area. Any work on these types of materials requires approval of the Safety Office.

Lab Safety Manual: Laboratory Use/Procedures and Policies

Table 4-1 - Summary of ANSI Z87.

Lab Safety Manual: Laboratory Use/Procedures and Policies

All stages of an investigation, from design through completion, must consider safety as a guiding principle. Keep good balance and proper footing at all times.
