### ADHD: The Facts

Disruptions in serotonin levels and activity may also play a role, particularly in affecting the modulation and regulation of the dopamine system. The American Journal of Psychiatry, 163 4 , 716-723. Cerebral Cortex, 24 4 , 935-944.

### ADHD

As with all medicines, children taking these drugs must be carefully monitored by their parents and doctors. A person with impulsiveness may have more accidents and injuries than others.

### What Is ADHD?

It is hard to sit still for long e.

### 14 Signs of ADHD: Does Your Child Have ADHD?

Clinical Psychology Review, 31 3 , 328-341.

### ADHD

A frenetic, impulse-driven life is sometimes treatable, but it's best treated early. Children who are exposed to inconsistent discipline, or who suffer from neglect, may find it more challenging to rein in their impulses or direct their attention later on.

### What Is ADHD?

Psychiatry Investigations, 9 3 , 269-277.

### What is ADHD?

As with other mental health and behavioral disorders, likely play a role, but more recent research also implicates exposure to environmental toxins such as pesticides or lead, as well as prenatal cigarette or intake. It is hard for the person to wait their turn or listen to directions.

### **What Is ADHD?**

They may also lose things often, such as toys. For children, treatment usually consists of teaching parents and teachers how to provide positive feedback for desired behaviors and consequences for negative ones. The symptoms are not the result of person being defiant or hostile or unable to understand a task or instructions.
