of having children with human women. He drowned but was transfigured as the marine deity Palaemon, while his mother became.

### **Dolphin**

At birth, a newborn dolphin has hairs lined up in a single band on both sides of the rostrum, which is their jaw, and usually have a total length of 16—17 cm.

**ESPN: Serving sports fans. Anytime. Anywhere.**

Cetacean spindle neurons are found in areas of the brain that are homologous to where they are found in humans, suggesting that they perform a similar function. Dolphin meat is high in mercury and may thus pose a health danger to humans when consumed. The record-holder of documented orca fatal attacks is a male named , who lived at from 1992 until his death in 2017.

**ESPN: Serving sports fans. Anytime. Anywhere.**

. As well as this, the eyes of a dolphin are placed on the sides of its head, so their vision consists of two fields, rather than a binocular view like humans have. Dolphins also display culture, something long believed to be unique to humans and possibly other species.

### **Dolphins**

They cover their with to protect them while foraging. The blubber manipulates the blood vessels to help the dolphin stay warm.
