When requesting a correction, please mention this item's handle: RePEc:tafbushst:v:53:y:2011:i:6:p:976-980. An exemplar of how the history of technology can help us understand our own cities, this book not only adds critical new information regarding such prominent but enigmatic corporations as SAIC and the Carlyle Group not to mention AOL and NRA, but also unites the strains of 'regionalism' and 'federalism' in the history of technology. Ceruzzi finds that a variety of perennially relevant issues intersect here, making it both a literal and figurative crossroads: federal support of scientific research, the shift of government activities to private contractors, local politics of land use, and the postwar movement from central cities to suburbs.

**Paul E. Ceruzzi. Internet Alley: High Technology in Tysons Corner, 1945**

The dot-com bubble's burst was offset here, he points out, by the government's growing national security-related need for information technology.

**Internet alley : high technology in Tysons Corner, 1945**

At the center of that corridor is Tysons Corner--an unincorporated suburban crossroads once dominated by dairy farms and gravel pits. The dot-com bubble's burst was offset here, he points out, by the government's growing national security-related need for information technology. The Army wanted to replace its director, but.
