dblp: Software Testing and Analysis

The Metro Vancouver region is vulnerable to significant seismic activity and numerous secondary hazards such as soil amplification and liquefaction.

Social disruption following an earthquake in metro vancouver: a spatial assessment of social vulnerability to earthquakes in metro vancouver, british columbia

The main areas of vulnerability in Metro Vancouver are in areas where pipes cross bodies of water due to high liquefaction potential. Monitoring planktivorous seabird populations: Validating surface counts of crevice-nesting auklets using mark-resighting

Wildlife Publications, Alaska Department of Fish and Game

The Chi-Chi earthquake also demonstrated that damage to high-voltage transmission lines causing widespread power disruption is possible following a seismic event Schiff et al, 2000. Mortality of alkali bees AB , alfalfa leaf cutting bees LB , and honey bees HB , exposed to different age residues of methomyl applied to field plots of alfalfa. In recent years many collections have been made in these habitats, especially in the southern part of the province.

Verification of liveness properties using compositional reachability analysis

Tools and methods of competitive engineering: Proceedings of the ninth International Symposium on Tools and Methods of Competitive Engineering TMCE 2012 , Karlsruhe, Germany, May 7-11, 2012. An evaluation of the relations between flow regime components, stream characteristics, and species traits and meta-demographic rates of warmwater streams fishes: Implications for aquatic resource management.

TDS

We propose a three-year study that explores the relationship between downed wood, microclimate, and wildfire on terrestrial salamander diversity. This omission was not caught in time for correction in this report; however, the consequent underestimation of losses may be significant and should be addressed in subsequent research.

Proceedings of the Symposium on Testing, Analysis, and Verification (TAV4) : Victoria, British Columbia, October 8

He is a founding member and chairman of the Scientific Association for Product Engineering WiGeP and a member of the National Academy of Science and Engineering acatech.

Proceedings of the Symposium on Testing, Analysis, and Verification (TAV4) : Victoria, British Columbia, October 8

In Proceedings of the ASTC-2001 Advanced Simulation Technologies Conference, Seattle, Washington, USA, April. Evaluate arriving and post-spawning spring Chinook salmon for other potential pre-spawning mortality causes including environmental stressors, disease, and parasites.
