It is a versatile and complex discipline requiring a lot of skill expertise from both students and specialists, including the efficient management. Build your knowledge with top universities and organisations. Particularly, ISPRA provides recent data about the cultural assets at risk of landslides in Italy that are 37,847 equal to 18.

**Disaster risks and management policies and practices in Nigeria: A critical appraisal of the National Emergency Management Agency Act**

The archaeologist tells you that it is a very important discovery. It was observed that the Act focuses more on establishment and functioning of the nodal agency NEMA for disaster management rather than on development of action plans for mitigating or preventing or minimizing the risks of disasters in the country. The Dioceses were divided on the base of their size depending on the number of inhabitants, according to the data by CEI, as described above in three classes: Small Dioceses with a number of inhabitants fewer than 150,000 ; Medium Dioceses with a number of inhabitants between 150,000 and 500,000 ; Large Dioceses with a number of inhabitants greater than 500,000.

**Avoiding Archaeological Disasters**

The acknowledgment of intangible aspects such as local traditions, practices and craftsmanship, moves in the direction of the acceptance of cultural diversity as a source of enrichment for the whole of mankind Vecco.
