## MeSH

Comprehensive controlled vocabulary for the purpose of indexing journal articles and books in the life sciences Medical Subject Headings Content Description Medical Subject Headings Data types captured Contact F B Rogers Primary citation Access Website Medical Subject Headings MeSH is a comprehensive controlled vocabulary for the purpose of indexing journal articles and books in the.

## Medical Subject Headings (MeSH)

If you want to cast a wide net with your search results, it is again a good idea to combine MeSH with other strategies, to ensure that you retrieve content from the non-MEDLINE journals as well as the MEDLINE subset. To put it another way, the first interpretation is more specific and the second less specific.

## Medical Subject Headings

Both of these are freely available for users on the corresponding website. MeSH terms are arranged in alphabetic order and in a hierarchical structure by subject categories with more specific terms arranged beneath broader terms. Leverage the vocabulary used to describe gene information in PubMed to build a better search.

## Medical Subject Headings

It serves as a thesaurus that facilitates searching. The tree numbers of a given descriptor are subject to change as MeSH is updated. A given descriptor may appear at several locations in the hierarchical tree.

## Medical Subject Headings (MeSH)

Structure MeSH vocabulary is divided into four types of terms. A 30-minute presentation featured a MeSH tree clean-up project; a new Clinical

Study publication type; changes to the trees for diet, food and nutrition; restructuring in pharmacology and toxicology; and new terms in psychology and health care. References for specific statements in the descriptions are not given; instead, readers are referred to the bibliography.
