Rare Native Ohio Vascular Plants. San Clemente Island, one of California's Channel Islands, has 272 native vascular plant species, 47 of which 13 % are endemic. The rapid recovery of populations subsequent to the removal of goats suggests that considerable recruitment has occurred from the seed bank, and our genetic data suggest that the seed bank maintains substantial genetic diversity.

Allozyme Variation in the Endangered Insular Endemic *Castilleja grisea*

Atlas of the rare vascular plants of Ontario. Ohio Department of Natural Resources.
