questions so that you can reflect on the lessons just conducted: Were the students motivated to participate in the activity? From the constraints imposed by these rhythmic patterns, melodies emerged naturally as I composed, special to each prime. That year has changed the way that I study and learn about science even today. Next, our teacher called on three students to ginny pig his experiment, two to stand beside the peel in the event that someone slip and fall, and one to step on the banana peel and test its lubrication.

## Support Math Readiness Through Music

Even young infants sway, bounce, or move their hands in response to music. Using a mnemonic device to do this is a method that can later be applied to other memory skills, says Mary Larew, Suzuki violin teacher at the Neighborhood Music School in New Haven, Connecticut. These rhymes and songs help connect the beat with an action and the numerals.
