more likely in older women than younger women.

### Risks of Pregnancy Over Age 30

Mothers 35 and older had slightly higher rates of fetal distress 5.

### Trying for pregnancy after 35

While total births are falling, the rate of women over the age of 35 who are having their first child has steadily risen since the 1970s.

### Pregnancy Risks After Age 35

Last reviewed: February 2020 This information is for your general information and use only and is not intended to be used as medical advice and should not be used to diagnose, treat, cure or prevent any medical condition, nor should it be used for therapeutic purposes. Because women begin to ovulate less frequently after age 30, the number of opportunities to achieve fertilization decreases as each year goes by.

### Pregnancy Risks After Age 35

Those pregnancies that continue normally result in a fetus with any one of a number of physical abnormalities.
