Technological Change and its Impact on the Labor Market in Egypt

The main factors behind limiting the unemployment rate are establishing many

of the new industrial cities, national projects, and expanding the process of distributing the agriculture and cultivating lands on the graduates. The Egyptian population is always described as a young population; where the percentage of population less than 15 years of age about 38 1996 census.

khaled Abdelgawad

He also presented many scientific research papers in many of international conferences, such as IUSSP International Population Conference 2009 and 2013, Annual Meeting of the American Society of Tropical Medicine and Hygiene ASTMH, 2009, African Population Conference, Tunisia, 2007, Conference on Documentation and Electronic Archiving, Dubai 2005, and in many seminars at Cairo Demographic Center CDC. The changes have not restricted only on the size of labor force but it extended to its structure.

PSC Analytical and Technical Report Series

The PSC Analytical and Technical Reports Series was published between 1961 and 1974 at the Population Studies Center PSC. There is no doubt that labor migration becomes an important global phenomenon in recent decades. Integration of the demographic dimension and absorbing the core of age-structure-transition in formulating national development strategies and plans in Arab countries received a great thought during the past view years.
