The scribe of the oldest known copy of these Questions, MS. However, medieval logicians were aware of the problem of existential import and maintained that negative propositions do not carry existential import, and that positive propositions with subjects that do not are false. The modality in this reading of the sentences applies to the manner in which the predicate belongs to the subject.

## Formalizing Medieval Logical Theories: Suppositio, Consequentiae and ...

Consider the following example: A necessarily aB, which should convert to: B necessarily iA.

## Medieval Philosophy

In the early fourteenth century, Campsall tried to save Aristotle by developing a more radical interpretation restricting the supposition of subject and predicate terms in modal sentences.

## The Reception and Impact of Aristotelian Logic in Medieval Jewish Culture

Thus, the Ockamist influence of the English German nation on Albert was quite strong. If we stay within the square of opposition Buridan's theory of distribution, and hence his syllogistic, has wide application, extending far beyond the traditional A, E, I, and O sentences, this implies that universal affirmative sentences have their subject terms distributed, universal negatives have both terms distributed, particular affirmatives have neither term distributed, and particular negatives have only their predicate terms distributed. Whatever Boethius thought he was doing, he was not trying to develop a sentential logic.

## Introduction to Logic

Likewise, in the very first question of the same work, he gives an example of his view concerning the breadth of the discipline of logic. Anyone who has had more than passing contact with the field of medieval logic, grammar, rhetoric, semantics has come across Sten Ebbesen, whose work is wide-ranging in time, place, and content.
