

Characterisation and application of a new solid phase for bioaffinity HPLC

University of Birmingham - Hplc Mobile Phase: Requirement and precautions.

Description: -

-characterisation and application of a new solid phase for bioaffinity HPLC

-characterisation and application of a new solid phase for bioaffinity HPLC

Notes: Thesis (Ph.D)-University of Birmingham, School of Chemical Engineering.

This edition was published in 1991

Filesize: 23.64 MB

Tags: #Effect #of #Mobile #Phase #pH #on #the #Electrospray #Ionization #Efficiency #and #Qualitative #Analysis #of #Pharmaceuticals #in #ESI #+ #LC

XanTec bioanalytics GmbH

Selected work published between 2008 and mid-2012 is covered.

Solid phase synthesis of a heptapeptide

Irth H 2007 Continuous-flow systems for ligand binding and enzyme inhibition assays based on mass spectrometry. MISPE application in fungicides Table lists the applications of MISPE to the extraction of fungicides in various samples. Therefore it is considered inappropriate to establish acceptance criteria that tightly encompass the batch data at the time of filing see section 2.

Effect of Mobile Phase pH on the Electrospray Ionization Efficiency and Qualitative Analysis of Pharmaceuticals in ESI + LC

XanTec SPR systems then allow you to quantify just how much off-target binding is occurring, and this can then be minimised with further development.

Solid Phases for Immunoaffinity Adsorption

Inset: schematic representation of the biochemical binding process during on-line bioaffinity assay with MS readout.
