## TPWD Kids: Texas Panhandle

Thus the last members of the Corps of Discovery departed from what is now Montana.

## Glacier National Park Visitor Information

In one location below the mouth of the Marias River the party killed nine sheep in a single day. Collected September 21, 1804, in present-day Lyman County, South Dakota, in the Big Bend region. As noted previously, bighorn sheep were first observed at the mouth of the Yellowstone River in extreme western North Dakota and were subsequently seen as far west as the Beaverhead Mountains in Montana.

**Susan J. Tweit**

The mountain sucker was not described until 1892, with specimens from western Montana.

## Interpretive Panels

In his summary of the natural history of the expedition, Raymond Burroughs calculated that at least 113 beaver were killed over the entire expedition period. At various times he attended Illinois College, Illinois Institute, and Oberlin College. Moose are the park's largest mammals.

## 10 Facts about the Rocky Mountain Region

On May 14 six men set out to kill a grizzly bear. Finally, when there are many species that are widespread, difficult to distinguish, or very similar ethnobotanically, as is the case with amaranth, greenbrier, and yucca, the genus becomes the focus and species are mentioned only to make nuanced distinctions.
