Allergy, Clinical Immunology & Rheumatology

This research has been supported by the NRF. Procedural experience with hypersensitivity skin testing, allergen immunotherapy, food and medication challenges, prescription of gamma globulin replacement and biologic treatments, and interpretation of pulmonary function testing will also be included. The extended identification of the genetic defects, frequencies and prevalence and prophylaxis, in collaboration with laboratories in Cardiff and UCT Chemical Pathology Dr Tricia Owen and Dr Felicity Leisegang is also globally unique and has made us world leaders in this area of primary immunodeficiency.

About Allergy and Clinical Immunology

This article will also serve as a backgrounder to the immunopathological disorders discussed in the remainder of this supplement. Joshua Boyce, the division includes 22 board-certified physicians who are also faculty members at Harvard Medical School and an outstanding research faculty with expertise in innate immunity Boyce Lab, Balestrieri Lab, Dwyer Lab, lymphocyte biology Brennan Lab, Wesemann Lab, Chen, Tong, Zuo, epithelial biology Bankova Lab, Barrett Lab, clinical sciences Laidlaw Lab, Buchheit, Louisas, Foer and genomics Lee-Sarwar, Wang.

Allergy and Clinical Immunology Division

Potter P, Mitha E, Mezei G, Santamaria E, Izquierdo I, Maurer M. The unit is an accredited unit for subspecialty training in Allergology and is currently involved with the training of one adult allergology and 3 paediatric allergology subspecialists. Ann Allergy Asthma Immunol, 2015.

Immunological and Clinical Aspects of Allergy

Adaptive immunity, on the other hand, is antigen-dependent and antigen-specific and, therefore, involves a lag time between exposure to the antigen and maximal response. Meetings are held monthly, 5:30-7 p.
