cumulative dose of each agent is kept low to minimize long-term effects from the chemotherapy regimen, as used in previous COG trials COG-P9641 and COG-A3961. Emerging science regarding sex differences in neurological and psychiatric illnesses, including anxiety, reproductive health, conversion disorders, depression and ethical issues in pregnancy, stroke risk factors, and successful aging strategies are covered along with clinical application of this knowledge to the delivery of care.

Neuroblastoma in Children and Teens

J Nucl Med 59 3 : 502-508, 2018.

Neuroblastoma in Children

Treatment on ANBL0531 was allocated on the basis of symptoms, age, and tumor biology. Close to 70 percent of children diagnosed with neuroblastoma will have metastatic disease. The search can be narrowed by location of the trial, type of treatment, name of the drug, and other criteria.
