## Employment, Labour and Informal Sector

It therefore might be reasonable to expect that during crisis times, some of those who have lost their jobs would move into informal sector self-employment.

## Methodological gaps and opportunities for studying multisectoral collaboration for health in low

As such they do relate to the earlier discussion in Section 1. The seven global targets are: a Substantially reduce global disaster mortality by 2030, aiming to lower the average per 100,000 global mortality rate in the decade 2020—2030 compared to the period 2005—2015; b Substantially reduce the number of affected people globally by 2030, aiming to lower the average global figure per 100,000 in the decade 2020—2030 compared to the period 2005—2015; c Reduce direct disaster economic loss in relation to global gross domestic product GDP by 2030; d Substantially reduce disaster damage to critical infrastructure and disruption of basic services, among them health and educational facilities, including through developing their resilience by 2030; e Substantially increase the number of countries with national and local disaster risk reduction strategies by 2020; f Substantially enhance international cooperation to developing countries through adequate and sustainable support to complement their national actions for implementation of the present Framework by 2030; g Substantially increase the availability of and access to multi-hazard early warning systems and disaster risk information and assessments to people by 2030. This will also include public health social awareness programs, labor-intensive public work programs and slum upgrading as early recovery measures to COVID-19, as well as leveraging technology for effective health emergency response and recovery in cities.

## Urban Development Overview

An important source of data on these relationships are from a current set of comparative workforce development studies in five countries — Egypt, El Salvador, India, Russia and South Africa.

## Mainstreaming Informal Employment and Gender in Poverty Reduction

But the working poor, especially women, have greater difficulties than the non-poor in benefiting from this resource because of their more limited access to computers, to training in their use and to education in general.

### **The Role of the Informal Sector in Provision of Urban Housing and Facilities**

Finally, to the extent that the South African experience of the 2008 crisis was similar to other MICs, these findings have important implications for the populations of these countries. In the process, two key global facts tend to be overlooked: 1 that the vast majority of the poor work; and 2 that the vast majority of the working poor, especially women, are engaged in the informal economy.

### **Employment, Labour and Informal Sector**

More recently, he has advocated one form of regulation: the formalisation of property rights for the informal workforce to help them convert their informally-held assets into real assets de Soto, 2000.
