## 5 Most Popular African Staple Foods

Similar AYT is also being done at RIARC-San Jorge, San Jorge, Samar.

## The Role of Technology in Achieving Global Food Security

READ as many books as you like Personal use. As a result, the produce may be exposed to rewetting in case of rains. Ecological intensification involves farming practices such as intercropping, integrated pest management, conservation farming and organic farming.

## Sub

Backward linkages include economic relationships with enterprises engaged in farming, primary processing, paper, plastic, metal and chemical industries. Erosion and loss of forest ecosystems, genetic resources, and other forms of biodiversity is increasing due to a series of anthropogenic and natural causes. The company was consequently expected to reduce imports of nonmilitary requirements and ensure regular supplies.

## Post

Furthermore, limited utilisation of all sources of food crops, livestock, fishery, aquatic, and marine resources, and forest products leads to staple diets based on a very narrow selection of food sources.

## DA Region 8

Post-harvest losses of crops carry the burden of all resources consumed in producing the harvest that is lost. Quality of Farmer Produce Dry samples 500 g per sample were collected from every respondent representing a household for as long as the crop sample s were among the nine selected by the study. Food security can be achieved by using knowledge of the best practices based on science.

## **Agricultural Transformation Technologies and Innovations**

Due to the rising cost of teff, however, many Ethiopians and Eritreans are replacing it with rice, wheat, and corn. This study was aimed at establishing the postharvest handling practices and estimating qualitative and quantitative postharvest losses for maize, millet, sorghum, beans, groundnuts, cassava, and sweet potatoes among farmers in 3 districts Kamuli, Apac and Nakasongola in Uganda, representing different agro-ecological zones. Farmer Post-Harvest Practices The dominant harvesting and post-harvest handling methods recorded were manual and quite labour intensive.
