## Ponderosa Pine (Pinus ponderosa)

In central Oregon, where sites are less productive, trees 13 to 51 cm 5 to 20 in in d. The Acland family at Mount Peel Station had made the first NZ introduction of British seedlings in 1859.

## Western Pine Beetle

Climate Ponderosa pine is typically dominant on warm, dry sites with a short growing season and very low summer precipitation. Several commercially available formulations of insecticides, both bole-applied and injectable, are effective in preventing western pine beetle attack.

## Individual tree height increment model for managed even

Growth At lower elevations, ponderosa pine grows in relatively pure stands while higher up it grows mixed with other conifer species. Intermountain Forest and Range Experiment Station, Ogden, UT.

## Site classification of ponderosa pine stands under stocking control in California (Book, 1978) [mikhmon.us.to]

Crowns of infested trees fade from yellow to straw to sorrel within a year. In Proceedings, Second Genetics Workshop of Society of American Foresters and the Seventh Lake States Forest Tree Improvement Conference 1965. In summary, our results showed that completely controlling competing vegetation increased plantation growth.

## Thirteen

Initial root development of ponderosa pine seedlings as related to germination date and size of seed. Fire suppression over the last 100 years has allowed unnaturally high buildup of fuels and allowed ponderosa pine dominated stands to be crowded with white fir.
