english

All of it makes for an interesting read although there were long spots in the book that were less interesting. What So has the interaction between an man--machine, a text, and a tomato? Therefore, to say that in the mind of the scientist there is something like a childlike spirit is not a rhetorical phrase but indicates a distinctive feature of the attitude required to understand reality: to know how to look, to allow oneself to be amazed by what is there. Small disturbances in a detector or small differences of concentration in a solution can lead to radically different consequences.

## Great Physicists: The Life and Time of Leading Physicists from Galileo to Hawking

The same sense of inevitability can be found again, only in part in our modern standard model of the strong and electro-weak forces that act on elementary particles. That passion is rather common in children, but gets lost in most people later on.
