Universität München Received PhD in Theoretical Physics 1921. The mass of the neutron ought to be about the same order of magnitude as the electron mass, and in any case could not be greater than 0. That is, is there a difference in the experimental results if the set-up is already predetermined to test either the particle or wave nature of a photon normal-choice versus a set-up that makes this choice while the photon has already passed BS 1 but not yet BS 2 delayed-choice? This fundamental pure number had greatly fascinated Pauli,.
