### Top 5 technological advances of the 21st century

Science is on the verge of providing what - up till now - only religion has claimed to offer - a genuine prospect of immortality, and the ability to understand the deepest mysteries of life. Magazines and newspapers ran the photo, signaling the power of shocking images as a new weapon in the generations-long struggle for black rights. .

### The Impact of Technology on the Developing Child

Nobody today would claim that gas lamps and plumbing technologies obviate the need for welfare. But they are not enough. In learning science, students need time for exploring, making observations, taking wrong turns, testing ideas, and doing things over; time for building things, calibrating instruments, collecting things, and constructing physical and mathematical models for testing ideas; time for learning whatever mathematics, technology, and science they need to deal with the questions at hand; time for asking around, reading, and arguing; time for wrestling with unfamiliar and counterintuitive ideas and for coming to see the advantage in thinking differently.
