MANAGING SMALL

Existing approaches have failed to constrain fishing capacity or to manage conflict. Welcome to CAB Direct CAB Direct is the most thorough and extensive source of reference in the applied life sciences, incorporating the leading bibliographic databases CAB Abstracts and Global Health. It shows how to use these methods in a practical way and places a strong emphasis on ecosystem management and participatory decision-making.

Projects in the Field: Testing Electronic Monitoring in Puerto Rico's Artisanal Fleet

Unique themes treated: fisher behavior and incentives for management beyond rights-based approaches; a synthesis of proposed 'solutions'; a framework for understanding and overcoming the critical determinants of the decline in fisheries, degradation of marine ecosystems, and poor socio-economic performance of many fishing communities; models for innovative policy instruments; a plan of action and adoption pathways to promote sustainable fishing practices globally. They have not kept pace with technology or with the driving forces of economics, population growth, demand for food, and poverty. .

It is hoped that the case studies will inform policy and policy processes and, in this way, promote sustainable small-scale fisheries according to the SSF Guidelines and the human rights based approach to development HRBA. FAO commissioned these studies with a view to share experiences and promote the implementation of the Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries in the Context of Food Security and Poverty Eradication SSF Guidelines. The scientific editors, Svein Jentoft and Arne Eide, are both with the Norwegian College of Fishery Science, Faculty of Biosciences, Fisheries and Economics, University of Tromsø, Norway.
