Committee Members

Melanoma is responsible for the most deaths of all skin cancers, with nearly 9,000 people dying from it each year. We are killing ourselves by permitting harmful social conditions to persist—conditions like poverty, hunger and ignorance—which destroy health, especially for infants and children. Many people consider oral signs and symptoms to be less important than indications of general illness.

History & Development of Healthy People

Pittman, DrPH, is Chief Executive Officer and President of the Public Health Institute PHI in Oakland, California. Determinants of Maternal, Infant, and Child Health Conditions in the places where people live, learn, work, and play affect a wide range of health risks and outcomes.
