Science, Religion, Evolution and Creationism: Primer

The authors explore cosmic evolution as a profoundly wondrous process based on creativity, connection, and interdependence, and they envision an unprecedented opportunity for the world's people to address the daunting ecological and social challenges of our times. These early organisms must have been simpler than the organisms living today.

Philip Hefner

By characterizing life as inherently competitive, it provides a pseudo-scientific justification for social Darwinism, colonial imperialism, racial domination, and the unrestrained competition of market fundamentalism.

When Worlds Converge: What Science and Religion Tell Us about the Story of the Universe and Our Place in It

The perception that scientists completely change their mind with each new discovery is mistaken. If there is to be a human future, we must fundamentally reshape our cultures and institutions to work in creative partnership with the structure and dynamics of the biosphere.
