Ice Cube Melt Science Experiment

Making Sense of the Investigation: Use the following prompts to help students make sense of the investigation. Is there any reason for them to have different temperatures? In addition, your access to Education.

Ice Cube Melt Science Experiment

Teacher content information: Rising levels of greenhouse gases being trapped our atmosphere are causing our atmosphere to warm up global warming. Now, prompt students to revisit their models for the ice melting phenomenon. .

DOES ICE MELT FASTER IN FRESH OR SALT WATER? Experiment

When most students appear to be done with defining the words, I lead a brief discussion about each word and together we come up with a definition for our science notebook. As the colder water sinks, it displaces and pushes up the warmer tap water from the bottom. Reflection questions What happened to the sea level when the sea ice melted? You can make changes on your original model or begin a new model.
