Shaping the Future of EP Through Advanced Signal Processing and Analysis

The main objective is threefold: 1 Increased aperture and improved spatial resolution, enabling separation between individual targets and clutter in both active and passive HF radars; 2 Combating ambiguity and providing unique answers to target location coordinates in active and passive wideband radar sensing under forced coarse sampling in time, frequency, and space.

Digital signal processing

The kick-off seminar allows students to get in touch with the professors and each other before the start of the program. You'll receive the same credential as students who attend class on campus.

Advanced Signal Processing (ENGEE531) : Catalogue of Papers

In addition, we also have a special mentoring program.

Cara Menulis Secara Ilmiah • Wacana Az

For more information see the. Topics include matrix factorizations and least squares filtering, optimal linear filter theory, classical and modern

spectral estimation, adaptive filters, and optimal processing of spatial arrays.
