14 CFR § 61.51

By the end of the flight-preparation phase, the crew should have a shared mental model of the flight plan and possible problems that might arise in normal operations. We taxied back to the gate to add more fuel, after waiting an hour or so on a taxiway, because our new route assignment was longer and would have required more fuel than we had on board.

General Aviation Accident Bulletin

Shortly after the loss of power the plane turned left and crashed. The ATIS message is updated whenever the situation changes significantly, with the new version designated by the next letter of the alphabet.

General Aviation Night Flying Guidance

It displays traffic provided to it by other avionics installed in the aircraft. .

14 CFR § 61.51

For example, adapting and expanding a briefing by highlighting the special aspects of an airport, the departure or approach procedure, or the prevailing weather conditions and circumstances usually result in a more lively and effective briefing. I'm not sure how you're dodging thunderstorms to achieve your 99 percent dispatch rate, but let me share a few stories of flying around the Northeast U.

Aviation Notes

Comparing 16 fatal accidents to the 1.

Flight Preparation and Conducting Effective Briefings (OGHFA BN)

I think flying on a Clay Lacy Jet or any aircraft of a similar outfit is just as if not safer than an Airline for statistics: who do you think builds up those 1000000 hours faster, a major carrier or your rental Gulfstream. This has taught me 2 things pilots are always learning -24 years ago I started

learning HaHa and second, a check out is half the job for a new aircraft you are going to fly.
