### Authentication

If you are in the fingerprint collection and identification business, a patent fingerprint is usually photographed for subsequent identification. However, the bureau's erroneous conclusion and flawed methodology still demanded attention. At block 1145, shown in FIG.

### Credentialing

In one embodiment, a Diffie-Hellman key exchange using a session key is utilized. To a Federal, State, or local agency, or other appropriate entities or individuals, or through established liaison channels to selected foreign governments, in order to enable an intelligence agency to carry out its responsibilities under the National Security Act of 1947, as amended; the CIA Act of 1949, as amended; Executive Order 12333 or any successor order; and applicable national security directives, or classified implementing procedures approved by the Attorney General and promulgated pursuant to such statutes, orders, or directives. For example, using a bankcard something the user has along with a PIN something the user knows provides two-factor authentication.

### Trademarks

Thus, here the user places his or her finger on the sensor At block 1430, the validity of the template on the token is confirmed. At its discretion, the USPTO may include short-term employees and contractors in the PIV ID program and, therefore, inclusion into the USPTO Personal Identification Verification and Security Access Control System PIVSACS.

### Credentialing

In one embodiment the main memory 1030 is dynamic random access memory DRAM. It will be apparent to those of ordinary skill in the art that other digital connections may also be used. About the author: Melissa Jenkins spends much of her time working to make complex concepts more accessible and understandable.

### Brand Fingerprint

If files were identified, the process continues to block 1160. Then, the cleaned up output of the CCD sensor 860 is passed through an analog to

digital converter 880, to digitize the fingerprint.

**US6125192A**

Therefore, the print which displays the fingerprint characteristics most clearly is selected. ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES: In addition to those disclosures generally permitted under a b of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside the USPTO as a routine use pursuant to a b 3 as follows: a. At block 1180, any default access is identified, and associated with the fingerprint.
