### Safe Motherhood Initiative

Who is at risk for vascular diseases? Your vascular system is your body's network of blood vessels. A PE can stop blood from reaching the lungs and can be deadly.

### Sickle Cell Data Collection (SCDC) Program

Learn about and tips on protecting yourself and your baby for a safe and healthy pregnancy.

### Safe Motherhood Initiative

Use the to help you determine your risk.

### Safe Motherhood Initiative

For more information on CDC's web notification policies, see.

### Vascular Disease

The symptoms for each disease are different. They are common and can be serious. The causes of vascular diseases depend on the specific disease.

### Sickle Cell Data Collection (SCDC) Program

Although blood clots are preventable, a PE is one of the most common causes of pregnancy-related death in the United States. To make a diagnosis, your health care provider will do a physical exam and ask about your symptoms and medical history. How are vascular diseases treated? Which treatment you get depends on which vascular disease you have and how severe it is.

### Vascular Disease

If you do need to sit all day, get up and move around every hour or so. If you are already a smoker, talk to your health care provider for help in finding the best way for you to. If you traveling on a long trip, you can also wear compression stockings and regularly stretch your legs.

### **Pregnant? Don't Overlook Blood Clots**

The risk factors for vascular diseases can vary, depending on the specific disease.
